

POLISHING – HOLOGRAM REMOVAL

USE:

- ▶ Removal of holograms and polishing defects caused by polishing
- ▶ Giving the highest surface gloss

SURFACE: Varnishes, paints and any color gelcoat

EFFECT: Smooth, free from defects, high gloss finish without any holograms

STEP I	STEP II	STEP III	STEP IV
SURFACE CLEANING	POLISHING	SURFACE CLEANING	SURFACE PROTECTION
Clean and degrease surface	Polish the surface until the polishing defects are removed and high gloss without holograms is obtained	Clean the surface from the polishing paste residue and contamination	Secure the cleaned surface from UV
